NGAARUHE HEI

Software Developer | IT Auditor | Data Enthusiast
📍 Windhoek, Namibia | 📞 +264 81 791 7888 | ✉️ ngaaruhehei11@gmail.com
Authorized to work in the EMEA region (Namibian Citizen)

SUMMARY

Analytical and results-oriented Software Developer & IT Auditor with hands-on experience in web app development, system testing, and cybersecurity risk assessment. Proficient in JavaScript, React, Node.js, SQL, and AWS. Adept at debugging, optimizing code, and ensuring IT system reliability. Passionate about applying technology to improve performance and drive data-driven decisions.

WORK EXPERIENCE

Kellerman ICT – Software Developer Intern | Jan 2024 – Jun 2024

- Developed an Inventory Management System to automate tracking and reporting.
- Optimized legacy code for system efficiency and fixed bugs during deployment.

Bank of Namibia – IT Auditor Intern | Oct 2023 – Jan 2024

- Conducted IT risk assessments for SWIFT systems and reviewed cybersecurity compliance.
- Supported internal audit teams with data analysis and process improvement.

Gmobility – Software Developer Intern | Feb 2023 – Jun 2023

- Designed and tested startup web applications.
- Collaborated in agile sprints to deliver innovative tech solutions.

EDUCATION

Namibia University of Science and Technology (NUST)

- BSc Computer Science (Software Development), 2020 – 2026

Certifications

- AWS – Getting Started with DevOps
- AWS – Generative AI with Diffusion Models
- Udemy – Beginner's Guide to Data & Analytics
- Udemy – JavaScript Essentials for Beginners

Projects

- Methealth-Comms-WebApp: Hack4Health Hackathon project improving healthcare communication.
- Auto-Vault-v2: Personal project with Mr. Nathingo focused on data automation & security.
- IJG Money Market App: Tester under LOTS – identified and fixed critical bugs during development.

ADDITIONAL INFORMATION

- **Programming:** JavaScript, React, Node.js, SQL, Kotlin
- **Frameworks & Tools:** Git, AWS, Docker, Ballerina, Kafka, VS code
- **Data & Analytics:** Power BI, Excel, Data Visualization, Reporting
- **IT Auditing: Risk** Assessment, SWIFT Systems, Cybersecurity Testing
- **Soft Skills:** Communication, Critical Thinking, Teamwork, Leadership

RE: Letter to Employer on behalf of Ms Ngaaruhe Hei (student no: 220120935)

Dear Sir/ Madam

The Faculty of Computing and Informatics at the Namibia University of Science and Technology (NUST) is offering a Degree - Computer Science specializing in Software Development. The Degree was designed in close cooperation with the local industry. One of the key components of these courses is practical in-service training *(hereafter called **"Work Integrated Learning"**)*.

Please allow me to elaborate a little on our **Work Integrated Learning** program:

The work-integrated learning component is scheduled for the final semester where the student will spend 12 weeks in the industry. One of the requirements is that students passed all 2nd years' subjects. Therefore, we assume that all students qualifying for work-integrated learning have a sound theoretical foundation. The primary purpose of the student's work-integrated learning semester is to provide the student with the opportunity to obtain hands-on practical experience in his/her relevant field of study. For this reason, it is imperative that the employer subject the student to meaningful and stimulating activities that are related to the student's field of study; e.g. minor software design and implementation projects, elementary research, administrative work, participation in related projects, etc. It is important that work accomplished by the student prove meaningful and beneficial to the employer. This aspect of the student's practical training will play a major role in his/her final assessment by NUST.

During the work-integrated learning, the department will continue to support and supervise the student. For each student, there will be one staff member appointed for supervision. This staff member together with the supervisor of the hosting institution will evaluate the work of the student.

This letter also serves to bring to your attention the continuous need for positions in Industry where the above-mentioned students can be placed for the purpose of performing their **work integrated learning.** Whilst we academic staff and students at NUST firmly believe that the studies offered are meaningful and relevant to the requirements of the country, we would like to think that we can count on your valued support, not only in providing bursaries but also in giving employment opportunities for students doing their **work integrated learning.** This will make a valuable contribution towards the development of the graduate who eventually approaches you for employment.

May I request that you mandate the decision makers in your organization who are involved with the recruitment and employment of technical personnel to proceed with the necessary steps to support students in this regard.

Thank you for your co-operation.
Yours sincerely

Mr. Gereon Koch Kapuire
Co-coordinator: Work Integrated Learning (Software Development)
